ABSTRACT

1. Analysis

1.1. Overview

Zippy LANG

A next generation language, for general use

Designed for keeping code simple, neat and readable

Zippy will be a modern functional language

It will be interpreted like python perl and lisp

Its syntax should be similar to lisp

1.2. Other examples

1.2.1. Python

Python is a high level OOP language that was designed in 1991

1.2.2. Lisp

Lisp is the second ever programming language, developed at MIT

1.2.3. Perl

Perl is scripting lang designed for use in linux, when bash is too slow, or not suited for the job

Perl is often described as the glue of the universe (see xkcd <https://3d.xkcd.com/224/>)

2. Design

3. Technical Solution

4. Testing

5. Evaluation
